## The Amazing Gas Mojo™

*This Phenomenal Device Produces  
Up To 25% Fuel Savings On ANY Car Or Truck!*

***EZ to Install • No Moving Parts • No Tools Needed • Guaranteed***

### What is the Gas MOJO Engine Booster™©

The Gas MOJO Engine Booster™© catalytically converts fuel. It is not a filter. It contains no metals, magnets or toxic substances and uses no electricity. The Gas Mojo™ unit is a specially designed tube containing a completely safe proprietary media. It is a passive fuel treatment process designed to break down carbon and other contaminants which build up in fuel and internal engine parts.

### How does it work?

The **Gas Mojo Engine Booster™** tube is attached to the outside of the fuel lines under vehicle. A wave of energy is produced from gas moving around the energy tube. This action causes fine particles to dislodge from gasoline and internal engine parts. This process atomizes fuel causing it to burn more hydrocarbons in fuel which makes fuel burn more efficiently. Does not change the basic gasoline formula and is completely safe for all types of gasoline and diesel engines.

### What are the \$\$ Savings

- Saves thousands of dollars per year in fuel and engine maintenance
- Savings versus costly fuel additives
- Reduces deposits in fuel lines thus reducing fuel pump wear
- Helps keep fuel injectors cleaner
- Helps reduce costly tune-ups which can save you hundreds of dollars a year
- Cleaner burning fuel keeps spark plugs cleaner
- Helps Improve combustion and performance
- Engine runs and shifts smoother
- Saves on fuel when operating at constant speeds
- Safe for all types of gasoline and diesel fuels
- One year warranty from date of purchase
- 30 day money back guarantee

### Easy Installation / No Tools Required

**Installs in a few minuets on fuel lines under vehicle with ties provided**

**Unit is 6" long and weighs just 5 oz.**

**To test the Gas Mojo take RPM reading on warm engine running in park. Then install Mojo and drive vehicle for 5 minuets. Then take RPM reading again. The RPM should drop. You will also notice smoother shifting and engine performance with in the first few miles of driving. For use on trucks, buses, cars, farm and earth moving equipment, portable generators, marine etc.**
