AS THE WORLD TURNS
Preparing For The Biggest Shift in Earth History
By Janet Starr Hull, PhD, CN

Book Proposal

Overview

Civilization is on the brink of one of the most astounding shifts in Earth history, but most of us think that the economy, politics, or the threat of war will be what determines the fate of our species. People don’t realize that the Earth, our planet itself, will be what changes our lives at the end of the day.

In 1955, Einstein wrote that when the Earth’s mantle shifts, the poles follow, and he was right. If we link the geologic past with the present, our future becomes oh-so clear.

Earthquakes, volcanoes, tsunamis, violent storms, pole shifts, and climate change – these major Earth events have been relatively quiet in our lifetime, but according to the science, these are the shifts that will change history. We can’t sit this one out.

Today, natural disasters are indisputably on the rise all over the globe, and the timing comes as no surprise. Dr. Hull writes in As The World Turns that while our global communities spend time “debating” global warming, the oil crisis, interest rates, and war, we are missing the warning signs that Earth changes won’t wait for us to untangle our knots. It’s time to stop wasting time, and step up our game.

Earth changes are impacting the lives of billions of people worldwide, and the signs of change are undoubtedly here. We now must determine what to do about them.

In As The World Turns, the author writes that whether we like it or not, Earth changes will create more natural disasters, but all is not lost. Earth changes can stimulate a much-needed evolution of awareness that will, one day, reseed our future.

These are the threads of the human story that we must clearly understand. The author writes that once we awaken to this fact, the transformations will be so profound, the world as we know it will be irrevocably changed for the better. Every detail of why we are here will be in harmony with the Earth, and as the Earth changes, we can safely change with it.

It is Dr. Hull’s aim in this book to help the reader understand that by looking at the Earth in ways no one has seen the Earth before, we can move more gracefully into the future, and dismiss our confusion and fears.
About The Author

Janet Starr Hull, PhD, CN has a diverse background with academic degrees and experience in geology, international geography, environmental science, toxicology, web publishing, higher education, and holistic nutrition. She is an OSHA Certified Environmental Hazardous Waste Emergency Response Specialist and Toxicologist (HAZWOPER), author, environmental engineer, and former firefighter. She was one of the first Americans to work on the remediation of the former Soviet Army bases in Eastern Europe after Glasnov, and currently teaches Environmental Science and Natural Disasters at Texas A&M University.

Dr. Hull has been the keynote speaker at conferences worldwide, and has addressed such distinguished audiences as members of the European Union and British Parliament. She has granted numerous radio and television interviews, such as NPR, 20/20, 60 Minutes, Good Morning Washington, and Good Morning New York. Her *10 Steps To Detoxification* program has been featured in *Woman’s World* magazine.

Dr. Hull founded Starr Resources International and Microbe Conversions, LLC in 1997. She created The Hullistic Network in 2004.

She lives on a wildlife sanctuary and conservation center in Northeast Texas where she and her youngest son founded a 501c3 charity organization for the protection and repopulation of endangered tortoises, birds, and endangered wildlife from around the world. Through education and on-going research, North Texas Tortoise Sanctuary is documenting ways to better understand and recognize the importance of these magnificent creatures.
