

Cure Arch Natural Wood Compact Warmer

Active Carbon Fibers Harmonic Resonance Heating Technology

Although Cure Arch is barely a palm size, the resonance energy is capable to warm you up in just half an hour. It delivers the softest warmth to your aching areas and delivers a faster pain relief solution right on the spot.

Note: Adapter Control unit may vary in size & length. To learn more about the Cure Arch see the web site below.

Ultimate Portability with 12V Power Supply

You can bring it anywhere and enjoy the soothing relief at any time. Enjoy it even while you are on the go with the optional 12V car charger. Cure Arch is approximately in the size of your smart phone with 7 inches length, 3 inches width, and weighs less than half pound.

Comfortable Arch Design

It is easy to grab with the unique arch design and the curve will let you sit on it comfortably. You may use it at any location that has an electrical outlet. It is a "Good to Go and Ready to Use" product.

Temperature Control

You can choose the most comfortable temperature using the temperature control knob. The maximum temperature is about 150F.

Thermally Protected for Your Safety

Each Cure Arch equips with a thermal protector that shuts off the power at 150F for about 10 mins. After 10 minutes, it will warm up again.

Low Electric Consumption

Cure Arch consumes less than 10W per hour. That's less than a penny in 10 hours use based on average electric cost in USA.

Finished with in-House Made Food Grade Stain

We finish Cure Arch with wine and walnut oil. The stain is specially formulated for Cure Arch not only does it provide a rich color and texture; it delivers a delicious and appealing aroma every time you use.

Durable Hard Maple Wood Construction

Multi-layered hard maple wood construction provides an exceptional durability. Cure Arch can withstand over 200 lbs vertical weight load.
