

## **Pesticide and ANA Tests**

### **TO ORDER TESTS THROUGH DIRECTLABS®**

All clients that are interested in getting biological monitoring tests at a significantly reduced rates should contact DirectLabs®

To order online: Go to: [www.DirectLabs.com/DrHildy](http://www.DirectLabs.com/DrHildy)

To order by phone: call 800-908-0000 Must give code: **R-HILD** for Integrative Health Systems/Dr. Hildy.

### **PESTICIDE TEST**

1) Chlorinated Pesticides/PCB's/Volatile Solvents Combo Profile-Genova Kit

**Description:**

The Chlorinated Pesticides Profile can help identify when a patient has been exposed to certain pesticides and insecticides, and how high a body burden of chlorinated pesticides the patient is carrying. This panel looks at the most commonly found chlorinated pesticides, which have national reference ranges, that have been documented to cause adverse health problems. Levels are given both in parts per million (PPM) and as lipid-adjusted amounts so the clinician can best estimate the total body burden of these compounds.

PCBs were used as lubricants and coolants in transformers, capacitors, and electronic equipment because of a high resistance to heat. Due to the stability of PCBs, unfortunately they also do not break down in the environment and stores in animals and humans.

The Volatile Solvents Profile can help identify a patient's prolonged exposure to the most commonly found volatile solvents that have been shown to cause serious health problems.

### **ANA TESTS**

Anti-dsDNA Antibodies

ANA (Antinuclear Antibodies) Screen, IFA with Reflex to Titer and Pattern

Sjögren's Antibodies (Anti-SS-A/Anti-SS-B)
