Dr. Hildy®'s Recommended ~ Mother and Child: Toxic Metal Assay Tests

If you suspect any exposure to Toxic Metals to your newborn, infant or child as well as Mom's and Dad's Dr. Hildy® recommends the following noninvasive tests as offered to you through Direct Labs and Integrative Health Systems®, LLC. **Account: R-HILD**

These Noninvasive Tests are ideal for Newborns, Infants and Toddlers as well as Mom's and Dad's. It is recommended that Mom or Dad get their test 1 month before a Newborn is born. Use first bowel movement of a newborn (from diaper) to establish the child's ultimate initial baseline Toxic Metal Exposure level. Infants and Toddlers may be tested at any time per parents request.

- Hair Test (gold included)
- Toxic Metal, Feces - Stool
- Calprotectin Test - Stool
- MTHFR Comprehensive Gene Swab Test
